

SERVIAM VACCINATION CENTER

SERVIAM "I will Serve" which every student in Ursuline schools lives with not only when they go to school but also when they have become alumni. Alumnae of St. Maria, St. Theresia, and St. Ursula Schools are called to take part in helping the government to overcome the Covid 19 pandemic. This is part of SERVIA M's call in real life: not thinking about one's own interests but also thinking about others. This awareness arises because we all want this world to be immediately freed from the Covid 19 epidemic which has claimed so many victims.

Unexpectedly many people wanted to help. When we opened the opportunity for volunteers, health workers signed up beyond our expectation. Such a large fund was needed that it made us shrink, but with enthusiasm the alumni looked for sponsors so that prior to implementation the funds would be ready because of the generosity of the people. Apart from that, bureaucratic matters were also a challenge, but thanks to the alumni's determination to help many people, all challenges were overcome. One challenge was that we come from three different schools, each of which has its own character, but thanks to SERVIA M this difference can be seen as a wealth that can enrich this committee. Of course this activity could take place because of the support of the Ursuline Sisters, the teachers who are also involved as volunteers in the midst of their busy teaching, as well as the staff who divide their time between their duties and responsibilities.

On Saturday, March 20, 2021, the SERVIA M Vaccination Center was finally opened. This center is open to firstly the elderly with a minimum age of 60 years old but it is now developing according to government regulations. This center will be open until June 10, 2021. It's quite a long time. Vaccines are provided by the government, who guarantees the availability of vaccines for those who get the first and second vaccine at the SERVIA M Vaccination Center. It is hoped that this Center can serve 500 people per day. This Vaccination Center is located at Santa Ursula

School, Jakarta and runs from Monday - Friday from 08.00 - 13.00. It is closed on Saturdays and Sundays and national holidays. Considering the lay-out of this school it is very possible for the elderly, with easy access to wheelchairs.

This pandemic is a humanitarian challenge so tackling it must also be seen from a humanitarian perspective as well, Cardinal Suharyo commented, when he visited the SERVIAM Vaccination Center. He hopes that the SERVIAM spirit will continue to exist in the nation's generation! This center has been visited also by the Indonesian Minister of Health, Deputy Minister of Health, Deputy Chairperson of the People's Consultative Assembly and Presidential Special Staff for people with disabilities, the Mayor of Central Jakarta, the Head of the District and the head of the local area. They appreciate our willingness to serve the community. The openness of the SERVIAM Vaccination Center accepts all levels of society regardless of religious, economic, racial status, etc. Appreciation also came from the vaccine recipients. They really appreciate this center because the health workers are very professional, the flow is very regular and the volunteers are very friendly and really helpful.

The committee believe that the project's success has only been possible through God's grace and at the morning celebration of the Eucharist each day, everyone asks for God's blessings on their efforts and intentions.
